SUMMARY

Frontend developer who builds responsive, user-focused web applications with React, Next.js, TypeScript and Tailwind CSS. Graduate of Route Academy's accredited Front-End Development Diploma. I have shipped projects end to end, from framework-free single-page apps to a full-stack developer community platform with a Node.js and PostgreSQL backend and real-time chat. I use AI-assisted development to work faster, I learn quickly on my own, and I care about clean, maintainable code.

SKILLS

Languages	JavaScript (ES6+), TypeScript, HTML5, CSS3
Frontend	React, Next.js (App Router), React Router, Context API, React Hook Form, Zod, NextAuth
Styling	Tailwind CSS, Bootstrap, responsive and RTL layouts
Backend	Node.js, Express, Prisma, PostgreSQL, Socket.IO, REST APIs, JWT & OAuth
Tools	Git, GitHub, GitLab, GitHub Actions, Docker, Vite, Vercel
Other	AI-assisted development (Claude), technical research & documentation

PROJECTS

LoopIn — Full-Stack Social Platform for Developers & Recruiters 06/2026 – 09/2026

[loopin-beta-lovat.vercel.app](#) · [GitHub](#)

- Designed and built a full-stack platform connecting developers and tech recruiters: a **React + TypeScript** front end and a **Node.js / Express** REST API (~76 endpoints) on **PostgreSQL** via **Prisma**.
- Implemented **real-time chat**, typing indicators, online presence and live notifications with **Socket.IO**.
- Built a social feed with code snippets (Markdown + syntax highlighting), reactions, reposts and comments, plus friends, follows, communities and pages.
- Added recruiter tools: **talent search** with skill filters, candidate shortlists and job postings.
- Secured the app with JWT, **GitHub & Google OAuth**, rotating refresh tokens, bcrypt, rate limiting, Helmet and Zod validation.
- Containerised with Docker and set up a **GitHub Actions** CI pipeline (type-check, tests, build); built a responsive dark/light UI.

RoutePosts — Social Media Web App 08/2026 – 09/2026

[route-posts-iota.vercel.app](#) · [GitHub](#)

- Built a social media single-page app in **React + TypeScript** on a REST API: sign up, log in, posts, comments, likes and notifications.
- Added token-based auth with React Context and **protected routes**; an expired token (401) logs the user out automatically.
- Built full CRUD for posts (text and image upload via FormData, with preview) and comments, including an emoji picker.
- Made likes update instantly (**optimistic UI**) and roll back with an error message if the request fails.
- Validated forms with **Zod + React Hook Form** (18+ age check, password match, per-field errors); added skeleton loaders and toasts.
- Structured the code in layers (API services, shared types, reusable components, separate layouts); styled with Tailwind CSS v4 and deployed on Vercel.

FreshCart — E-commerce Store

09/2026 – Present

- Building an online store in **Next.js (App Router) + TypeScript**: products, categories, brands, product details, cart and wishlist.
- Implemented authentication with **NextAuth** (credentials + JWT session) and route protection that redirects guests to login.
- Live cart and wishlist counters in the navbar via Context and server actions; UI built with Tailwind CSS and shadcn/ui.

Wanderlust — Travel Planning Dashboard

07/2026

ahmedhossam231169.github.io/Wanderlust · [GitHub](#)

- Built a single-page dashboard in **vanilla JavaScript (ES modules)** with no framework, split into services, views, state and UI layers.
- Integrated public REST APIs (Open-Meteo, Nager.Date, Ticketmaster, ExchangeRate API) for weather, holidays, long weekends, events and currency conversion.
- Cached API responses in memory to avoid repeated requests; saved trip plans to localStorage.

EDUCATION & TRAINING

Diploma in Front-End Development — Route Academy, Alexandria

02/2025 – 09/2026

Digitera Program, Technical Track — iCareer & Plan International Egypt

09/2026

Certificate of completion. Part of the “Ready for Tomorrow” youth employment program, supported by the Ministry of Foreign Affairs of Denmark.

Claude 101 — Anthropic Academy

08/2026

Prompting techniques, practical use cases and best practices for AI-assisted work.

Bachelor’s Degree in Sports Science — Alexandria University

2022 – 2026

LANGUAGES

Arabic — Native **English** — Intermediate (B1)
